SUBJECT INDEX

Volumes 86-88 A, B and C inclusive, 1987

A23187, 87B, 733

AAT, 86B, 373

ABRM, 88A, 557

Absorption of sodium, 86A, 653

Acanthephyra purpurea, 86B, 313

Acanthoscelides obtectus, 88B, 681

Acartia clausi, 88B, 105

ACAT, 87B, 697

Accipiter nisus, 86C, 379

Acclimatization, 86A, 217

Acebutolol, 87C, 83

ACE-I, 87A, 645

Acetaldehyde, 87C, 409

N-acetyl-galactosamine, 88B, 375

ACh, 86C, 103, 313; 87C, 335, 393, 440; 88C, 35, 121, 131, 249, 301

ACh (ABRM), 88A, 557

Achatina fulica, 86C, 353; 87C, 51, 59, 363; 88A, 263, 317, 707; 88C, 35

AChE, 87C, 335

Acheta domesticus, 87C, 161; 88B, 875; 88C, 185

Acid-base balance, 86A, 261

Acidic amino acid transport, 87B, 443

Acid phosphatase, 86B, 254; 87A, 845; 87B, 773

Acid stimuli, 88A, 487

Acinonox jubatus, 87A, 387

Acipenser transmontanus, 88B, 269

Aconitine, 86C, 11

Acris crepitans, 87A, 81

Acropora hebes, 87B, 507

ACTH, 88A, 131

Actin, 86B, 532; 87B, 171

Actinaria, 87B, 267

Actinia equina, 86A, 233; 87B, 267

Acyl CoA, 87B, 217

Acyl-CoA dehydrogenase, 88B, 19

O-acylglucopyranosides, 87B, 761

Adaptation, 88A, 119

Adenine, 86A, 703

Adenosine, 86A, 755; 86C, 415

Adenosine deaminase, 86B, 95; 88B, 91, 491

Adenosine-5-monophosphate, 87B, 481

Adenosine receptors, 88C, 75, 121

Adenosine triphosphatase (also see ATP), 86A, 693

S-adenosylmethione decarboxylase, 87B, 863

Adenylate cyclase, 86A, 453; 86C, 91; 88A, 349; 88B, 989

Adenylate-degrading enzymes, 86B, 109

Adenylate energy charge, 87A, 171

ADH, 87B, 417

Adipocyte, 86A, 515, 755; 88A, 33

Adipocyte metabolism, 87B, 537, 543

Adipose tissue, 87B, 533, 543; 88A, 33

Adonis aestivalis, 86B, 587

ADP-ribosylation, 87B, 473

Adrenalectomy, 86A, 397

Adrenal-gonadal systems, 86C, 295

Adrenaline (also see NA), 86C, 7; 87C, 31, 233, 425, 429

Adrenal medulla, 88C, 155
Adrenergic receptors, 88C, 69
Adrenocortical special zone, 86A, 361
Aedes aegypti, 88B, 595
Aeshna cyanea, 87A, 39, 47, 427
Aethomys namaquensis, 87A, 311
Aflatoxin B_1, 86C, 399; 87C, 275
Ageing, 86A, 617; 88B, 929
Agelaius phoeniceus, 87B, 933
AGEPC, 87C, 41
Age pigments, 88B, 777
Aging rat, 88B, 177
Agkistrodan acutus, 88B, 643
Agkistrodon halys, 87B, 329
Agonistic behavior, 86A, 473
Air-breathing in crab, 87A, 1
AKH, 87A, 193
Alanine, 87A, 171
β-alanopine, 88B, 803
Albumen, 88B, 863
Alca torda, 87C, 375
Alcian blue, 87A, 295
Alcohol dehydrogenase, 87B, 79
Alcyonium digitatum, 86A, 629
Aldehyde oxidase, 86B, 254
Aldolase, 87A, 27
Aldosterone, 86A, 697
Aldrin, 87C, 375
Alectis ciliaris, 86B, 509
Alkaline phosphatase, 86B, 483; 87A, 551; 87B, 367; 88B, 111, 133
Alkaline proteinase, 86B, 99; 87B, 1041
n-alkanes, 87B, 233; 88B, 681, 875, 911
O-alkylglycerophospholipids, 88B, 1
Alkylphosphonic acid, 88B, 603
Allelochemicals, 87B, 621
Alligator, 87A, 449
Alligator brain, 86B, 55
Alligator mississippiensis, 86B, 55, 755; 87A, 449
Allopurinol, 86B, 397; 86C, 63, 67; 87B, 489; 87C, 79
Alloxan induced diabetes, 88B, 547
Alnus incana, 87B, 885
Alouatta palliata, 88B, 729
Alpha$_1$-acid glycoprotein, 86B, 493
Alphaglucosidase, 88B, 1051
Ambystoma tigrinum, 86A, 429
Amia calva, 86A, 143
Amiloride, 87A, 333, 873, 885
Amines, 87C, 251
Amino acids, 86A, 173, 349, 553, 773; 87A, 319, 427; 88B, 65, 1013; 88C, 255
Amino acid levels, 87A, 57
Amino acid metabolism, 88B, 719
Amino acid transport, 86A, 301; 87A, 1055
4 amino crotonic acid, 86C, 305
2-aminoethylphosphonic, 88B, 969
2-aminofluorene, 88C, 171
P-aminohippurate, 86A, 713
Aminopeptidase, 87B, 755
Amino transferases, 88B, 223
Ammonia, 86A, 449; 86B, 689; 87A, 157, 851
Ammonia excretion, 87C, 1
Ammoniagenesis, 87B, 941
Ammotragus lervia, 87A, 711
AMP, 86B, 49, 109

AMP deaminase, 86B, 109; 88B, 1071, 1077
Amphibian, 86B, 167
AMP phosphodiesterase, 88B, 349
Ampullae of Lorenzini, 88A, 61
Ampullaria, 86B, 565
Amyda japonica, 87A, 645
Amygdala, 88A, 56
Amylase, 87B, 297, 755; 88B, 963
Anadara ovalis, 86B, 155
Anaerobic metabolism, 86A, 91; 87A, 1089; 88B, 651
Anaerobiosis, 87A, 171
Anarhichas lupus, 86A, 170
Anas barbariae, 88B, 519
Anas boschas, 86B, 675
Anas platyrhynchos, 86A, 397; 87C, 421; 88A, 229; 88C, 57

Information for Contributors

1. The journal will publish papers that contain the results of original research on the biochemistry, physiology and pharmacology of animals. Particular attention will be paid to those papers in which the subject is approached from a comparative point of view.

Part C of the journal deals with the study of the action of drugs and chemicals on cells, tissues and whole animals. In particular it is concerned with the differences between species, and organs, in their responses to drugs. The section will carry papers of interest to workers on insecticides, molluscides and antiprotozoan drugs.

In addition, basic research will be published on nerve muscle transmitters, nerve/nerve transmitters and other pharmacological studies on the simpler animals. Comparative biochemical and pharmacological studies will also be published.

2. English is the preferred language for papers.

3. Original communications should be sent to the Editor:

Professor G. A. KERKUT (Comparative Biochemistry and Physiology), Department of Physiology and Biochemistry, University of Southampton, Southampton SO9 3TU, England.

4. Submission of a paper to the Editor will be held to imply that it has not previously been published: that it is not under consideration for publication elsewhere; and that if accepted for *Comparative Biochemistry and Physiology* it will not be published elsewhere in the same form, in English or in any other language, without the written consent of the Editor.

5. The typescript, in general, should follow the conventional form—introduction and literature, materials and methods, results, discussion, summary and references. The paper should be prefaced by an abstract appearing immediately after the title and the author's name. *This abstract should consist of numbered sentences that summarize the main facts and conclusions of the paper. Not more than* 100 *words should be used, and* 50 *words are preferable.*

6. Communications should be in the form of typescript, with the lines double spaced on one side of paper (approx. 10 in. × 8 in.) and a left-hand margin of not less than $1\frac{1}{2}$ in. The submission of two typescripts (an original and a carbon copy) will facilitate refereeing; if only one is submitted, it should be the original. In either case, the author should retain a copy for his own use.

7. Authors are requested to keep their communications as concise as possible. **To conserve space, the author should indicate those parts of the paper that might be printed in small type.** Footnotes should be avoided and italics should not be used for emphasis. A running head (shortened title at the top of each right-hand page of an article) of not more than 45 letters and spaces should be supplied for papers with long titles.

8. In general it is not necessary to publish all the individual results of replicated experiments. A statement of the number, their mean value, and some appropriate measure of their variability is usually sufficient. The methods of an analysis followed should be indicated, but statistical details such as tables of analysis of variance should be given only if they are relevant to the discussion. A statement that the difference between the mean value of two groups is statistically significant should include an indication of the level of significance attained.

9. In the interest of economy, and in order to avoid the introduction of errors, tables will be reproduced by photo-offset means directly from the authors' typed manuscript, and the following points should therefore be observed during their preparation:

(*a*) **Tables should be prepared for direct camera copy.** Refer to current tables in the journal, and arrange the spatial layout of your table to conform.

(*b*) Type should be clear and even.

(*c*) Tables, headings and legends should be typed on a separate sheet. Indicate on a Xerox copy of the table where the headings and the legends should be inserted.

(*d*) Insert heavy rules at the head and foot of each table, and fine rules below column headings.

(*e*) Leave the *minimum* space required to avoid confusion between columns.

(*f*) Genus and species names, and other words normally italicized, should be typed in italics or underlined.

For guidance on how best to prepare tables for photographic reproduction, and in case of difficulty, please contact the Photoreprographic Section of your institution who will give you assistance.

10. All necessary illustrations should accompany the typescript but should not be inserted in the text. All photographs, charts and diagrams are to be referred to as "Figs", and they should be numbered consecutively in the order in which they are referred to in the text.

(*a*) **Photographs, including photomicrographs, should be glossy prints and should be restricted to the minimum necessary.** Each should have, lightly written on the back, the author's name, the figure number and an indication of which is the top of the picture. Lines or lettering to appear on the photographs should be in **good quality stencil.**

(*b*) *Captions to figures* should be typed consecutively on a separate page or pages at the end of the paper. The caption or legend should be sufficient so that the tables or figures are intelligible without reference to the text. The same data should not be published in tables and figures.

(*c*) Authors are requested not to submit sheets of illustrations larger than foolscap size.

(*d*) Authors should note that all illustrations, diagrams and graphs should have the FINAL labelling ready for press.

11. The full Latin name of all animal species used in the investigation must be given.

12. Full references should be given at the end of the paper in alphabetical order and should include the names of the authors, the date of publication, the full title of the paper, title of the journal, volume number and the first and last page numbers. References to books should include the number of the edition, volume, relevant pagination, the name of the publisher and the town of publication. In the text a reference should be quoted by the author's name and the date placed in parentheses, as, for example: Smith (1960). Examples of full references are given below:

Ashby W. (1943) Carbonic anhydrase in mammalian issue. *J. biol. Chem.* **151,** 521–527.

Kogh A., Warren B. and Holt C. (1977) *Physiology of Capillaries*, 2nd edn, Vol. 1, pp. 67–75. Pergamon Press, Oxford.

13. Abbreviations. Only standard abbreviations should be used. Where specialized terms are given, a specific abbreviation should be indicated as a footnote to the paper.

14. Page proofs will be sent to the author, or to the first-mentioned author in papers of multiple authorship, for correction. Reprints and copies of the issue (at a specially reduced rate) may be purchased using the order form which will accompany the proofs.

15. **Corrections to the proofs must be restricted to printer's errors only. Other than those, substantial alterations may be charged to the author.**

16. **The original manuscript and diagrams will be discarded one month after publication unless the Publisher is requested to return original material to the author.**

150TH ANNUAL MEETING

BRITISH ASSOCIATION FOR THE ADVANCEMENT OF SCIENCE

Setting sponsored by

Esso

OXFORD 5–9 SEPTEMBER 1988

Seize the chance of a lifetime and combine all the interest, variety and excitement of a BA meeting with a holiday in one of the world's most famous cities!

- Lectures, Demonstrations, Debates
- 'Hands-on', Commercial and other Exhibitions
- Scientific visits to many places of interest
- Film Festival and scientific 'Amusement Arcade'
- The beauties of the historic City of Oxford
- Multiple events for the younger scientist
- Exciting and varied Social Programme visits
- Receptions, Discos, Opera and Concerts
- All the fun of the famous St. Giles' Fair
- And much, much more besides!

The 150th Annual Meeting in Oxford 1988 is not to be missed!

To make sure you receive a copy of the preliminary programme in the Spring of 1988, please send your name and address to:

Physiology & Behavior

Editor-in-Chief:
Matthew J. Wayner
Division of Life Sciences
The University of Texas at San Antonio
San Antonio, TX 78285

Assisted by a distinguished international Editorial Board

PHYSIOLOGY & BEHAVIOR, published by Pergamon Press every 20 days (18 issues per annum), reports original research results in the areas of neural control of eating, drinking, body composition and body fluids; hormonal control of behavior; sleep activity; rhythms; taste and olfaction; and learning and memory. Since its premiere issue in 1966, the journal has earned the reputation of being an outstanding information source for researchers interested in the overlapping areas of physiology and behavior.

Articles aim to integrate anatomy, biochemistry, endocrinology, pharmacology and neurobiology within a behavioral framework using species such as insects, reptiles, birds and mammals. In recent years, studies focusing on human eating, stress, sleep, memory, hormones and behavior have been given increased attention.

Recent Articles

The Publication Devoted Exclusively to the Study of the Biology of Aging

Experimental Gerontology

An International Journal

Editor-in-Chief: LEONARD HAYFLICK, PhD

Professor, Center for Gerontological Studies, University of Florida, Gainesville, FL 32611, USA

Appearing in 1965, **EXPERIMENTAL GERONTOLOGY**, was one of the first journals dedicated to the publication of original research on the biology of aging. Today, this area of the life sciences is experiencing rapid growth and development.

EXPERIMENTAL GERONTOLOGY features research articles on the processes of biological aging, from the molecular level to the whole organism in plants, animals and humans.

The **Journal** contains the following sections:

Reports of Original Biological Research • Review Articles • Theoretical or Speculative Articles • Actuarial and Mathematical Articles • Special Articles • Book Reviews • Meeting Reports • Announcements and News Items • Letters to the Editor • Editoriais

SCIENCE CITATION INDEX *Journal Citation Reports,* published by the Institute for Scientific Information, reports that, for the last six years, articles appearing in **EXPERIMENTAL GERONTOLOGY** have been cited by authors more frequently than any other journal devoted exclusively to the biology of aging. The author of one article in a 1985 issue of **EXPERIMENTAL GERONTOLOGY** has received over 1,000 requests for reprints!

SELECTED ARTICLES:

- *In vivo* DNA Synthesis in the Dietary Restricted Long-lived Rat, **B.J. Merry and A.M. Holehan**, Vol. 20, No. 1, 15-28, 1985.
- Evidence of Schwann Cell Degeneration in the Aging Mouse Motor End-Plate Region, **R.M. Ludatscher, M. Silberman, D. Gershon, and A. Reznick,** Vol. 20, No. 2, 81-91, 1985.
- Effects of Aging on the Lipid Order and Composition of Rat Adipocyte Ghosts, **J.M. Rifkind, T. Suda, J.T. Wang, J. Heim, and G.S. Roth,** Vol. 20, No. 2, 99-105, 1985.
- Can Mutagenesis Reveal Major Genes Affecting Senescence?, **P.A. Roberts and R.B. Iredale,** Vol. 20 , No. 2, 119-121, 1985.
- Review Article: Theories of Biological Aging, **L. Hayflick**, Vol. 20, No. 3/4, 145-159, 1985.
- The Comparative Biology of Longevity and Lifetime Energetics, **W.A. Calder, III,** Vol. 20, No. 3/4, 161-170, 1985.
- Changes in Vasopressin- and Oxytocin-Immunoreactive Neurons after Hypophysectomy in Young and Old Mice, **K. Kawamoto and K. Kawashima,** Vol. 20, No. 5, 295-304, 1985.
- Does a Relationship Exist Between Spontaneous Locomotor Activity, Fitness and Lifespan in *Drosophila Melanogaster*?, **E. Le Bourg, F.A. Lints, and C.V. Lints,** Vol. 19, No. 3, 205-210, 1984.
- Metabolic Profiles of Rats of Different Ages, **S.C. Gates, S.J. Provancal, J.W. Webb, and A. Richardson,** Vol. 19, No. 4, 279-288, 1984.
